## "Save a Minute a Call in the Interest of All"

To-day time is at a premium. The Nation is awake, straining every muscle in the march towards National Preparedness.

Every minute counts. Every minute intelligently saved is a contribution towards greater national efficiency.

The Bell System handles thirty million telephone calls a day. If on each of these calls an average of one minute could be saved by more efficient use of the telephone, thirty million minutes more could be devoted to productive work.

This would be a tremendous contribution to National Efficiency. It would mean a saving of 20,833 days of 24 hours each—a saving of 57 years every day!

Just a little more care in calling correctly, in answering the telephone promptly, in speaking clearly and distinctly so that repeating of the numbers or of parts of the conversation is not necessary will quickly save the minute on every call.

> Will you do your part by trying to save a minute on every call you make, not only that you may save time, but also that you may help keep the lines clear for the all-important messages dealing with the National Defense?
